

Patterned Pavement Products

Decorative Surfacing System

“Customer Focused, Environmentally Committed Since 1984”

Patterned Pavement products are a hot applied synthetic asphalt material that bonds permanently to the surface. If you want the look of brick paving, but want it to last many years without any maintenance, then Patterned Pavement is the solution.

Imprint is a highly durable resin based synthetic asphalt. Colored throughout, Imprint ensures your streetscape retains its color in even the harshest traffic and weather conditions.

- Extremely durable with the authentic look and feel of pavers
- Hot applied synthetic asphalt with many colors to choose from.
- Reduce ongoing maintenance costs compared to traditional brick or concrete pavers.
- Can be applied on concrete or asphalt
- Color throughout product with seamless design
- No Water penetration and ready to drive on in 45 minutes
- Minimal traffic disruption for municipalities “get in- get out”

Street print XD is an aggregate reinforced thermoplastic that is installed directly on top of asphalt.

- Designed for high traffic crosswalks
- Faster Installation
- Minimal traffic disruption
- Skid/Slip resistant
- Smooth pedestrian friendly
- No need for a maintenance budget with XD
